Sentinel

Use Case

Zones Innovation Center is a multidisciplinary and collaborative technology environment that helps transform business use cases into working prototypes. Leveraging technology expertise, OEM alliances, and scalable technology platforms, Zones assists businesses in simplifying and accelerating their digital journeys. This use case showcases 'Sentinel' capabilities.

Solution Overview:

The purpose of this demo is to explore the Microsoft Azure Sentinel and look at what it takes to get it configured into the environment. In the demo you get to see the steps involved in configuration of the components required to get the data into the Sentinel and create actionable security insights.
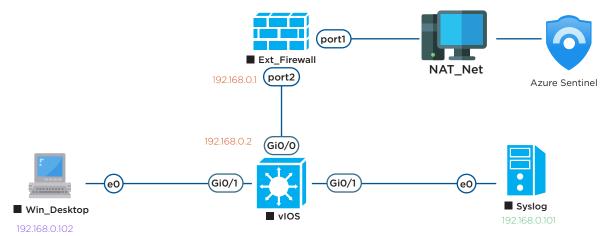

Microsoft Sentinel delivers intelligent security analytics and threat intelligence across the enterprise. With Microsoft Sentinel, you get a single solution for attack detection, threat visibility, proactive hunting, and threat response. Microsoft Sentinel natively incorporates proven Azure services, like Log Analytics and Logic Apps. Microsoft Sentinel enriches your investigation and detection with AI. It provides Microsoft's threat intelligence stream and enables you to bring your own threat intelligence
